## Impact of our completers on the results of the META-PR

META-PR is a standardized test that evaluates student academic achievement based on the curriculum and learning activities that take place in the classroom. At the same time, they allow the proficiency levels of the students to be identified; they offer direction to the teaching and learning process and contribute to decision-making on the training and professional development of teachers, among others.

**Resultados META-PR por materia y región**

The results of the META-PR for the academic year 2018-2019 show that in the areas of Spanish, mathematics and English, the students of the educational region of Arecibo obtained the highest results compared with another educational regions. Regarding the Science area, although the results of the Arecibo educational region were not the highest, they continue to be above the island average and the average of META results annually. This shows the impact of the completers who are working in the educational region of Arecibo, in addition to the impact of our teacher candidates who carried out their methodologies laboratories, pre-practice seminars and their teaching practices in these areas.
